## • Objective

To join the development and technology team, bringing my extensive experience in software development and information security. Contribute to the creation and maintenance of systems, improving the experience of the company's internal and external customers.

## • Summary/Skills

I am a passionate software developer and DevOps enthusiast, always looking for stimulating challenges. I have a collaborative and persistent mindset, ready to find innovative solutions. My commitment to continuous learning drives my desire to be an up-to-date and high-performance professional, with solid skills in various technologies.

**Programming Languages:** Java and JavaScript, as well as being immersed in the study of Python and Rust.

**Spring Framework:** Expertise in Spring-Boot, MVC, Security, Spring Cloud, Spring Data JPA, among others.

**Databases:** Experience with both relational databases, such as MySQL, Oracle, and PostgreSQL, and NoSQL databases, such as MongoDB and Firestore.

**Web Development:** Proficient in HTML, CSS, and JavaScript, with experience in frameworks such as Angular and VueJS.

**Containers and Orchestration:** Proficient in Docker and constantly improving in Kubernetes.

**Messaging and Security:** Experience with Apache Kafka, RabbitMQ, and authentication solutions like Keycloak.

**Computer Networks and Security:** My comprehensive understanding of these topics contributes to the creation of robust and secure environments.

**English:** I have advanced reading and listening skills, and intermediate conversation skills.

I am always ready to embrace new challenges and adapt to new technologies, ensuring that my knowledge and skills are always up-to-date and aligned with market demands.

## • Experience

### FullStack Developer – Freelancer

January 2018 to Present (6 years)

As a software developer, my main goal is always to seek highly effective solutions to meet the needs and challenges of my clients, contributing significantly to the success of their businesses through information technology.

My experience in freelance development translates into a series of successfully delivered and fully functional projects, where I was able to add substantial value to my clients. By visiting my portfolio, you can explore these projects in detail and understand how the technologies I mentioned earlier were effectively applied to meet the specific needs of each client.

### Software Developer - Unimed do Ceará

February 2021 to Present (3 years)

Currently working on the company's Innovation team as a software developer, my responsibilities encompass various aspects, including:

**Software Development:** Handling the development of applications and systems, I worked to create effective and efficient solutions that met the company's needs. This included both web and mobile projects, where I used my skills to deliver high-quality results.

**Infrastructure:** I took care of the maintenance of systems and projects, ensuring that the company's technological infrastructure operated smoothly on computer networks and firewalls, ensuring secure and efficient operation.

**DevOps Solutions Development:** I collaborated on the development of systems and accounts with a strong emphasis on DevOps practices, such as setting up CI/CD pipelines and Observability with Prometheus and Grafana, aiming to improve the efficiency and security of operations.

**Information Security and LGPD:** I understood the importance of information security and compliance with the General Data Protection Law (LGPD). I actively worked to ensure that the company's and its customers' data was protected and in compliance with regulations.

### Financial Analyst/Accountant – Unimed Centro Sul Ceará

January 2012 to January 2021 (9 years)

Responsible for the financial and accounting controls of the company, as well as the issuance and execution of payments and the preparation of financial/management reports.

Seeking to automate processes in the sector through software development.

Created a payment control system that reduced the payment issuance process in the company by two days. Making this process more consistent and agile, as well as having more accurate data in the generation of reports.

Automated all spreadsheets for the generation of management reports, only requiring the feeding of information that is already done in the payment system.

Dashboards and tables are generated automatically, reducing the delivery of these to the management by up to a week.

## • Courses and Certificates

### **OCI (Oracle Cloud Infrastructure) Certificate**

Oracle OCI Certification for Cloud Computing Environments

### **Microservices Spring Boot and Spring Cloud**

Spring Boot, Spring Cloud, Service Discovery Eureka, Gateway, AWS and Docker.

### **Computer Networks Training**

Switches, Routers, OSI, TCP/IP, VLAN, Cabling, Fiber Optics, Wireless for CCNA..

### **Devops and Software Development**

Docker, RabbitMQ, Apache Kafka, Authentication and KeyCloak, Software Architecture, Hexagonal Architecture

### **Java Web Full Stack Training**

Java EE, WebService, Hibernate, PostgreSQL, JSF, Spring, Vue, Thymeleaf, JasperReport

### **Spring Boot Expert**

Spring boot, JPA, RESTFul API, Security, JWT, Junit, Git.

### **Apache KAFKA for Event-Driven Spring Boot Service**

Java, Spring Boot, Spring Security Apache Kafka

### **UML Data Modeling**

Modeling Java projects using UML.

### **Complete Web Development**

Spring Boot, RestFul, React JS, and Git.

### **Java 2020 Complete: From Zero to Professional**

Covering Java 8, 9, and 10.

### **Spring Framework, MVC, and Rest API**

Spring MVC, Spring Boot, Spring Data, Spring Security, JavaScript, Bootstrap, Thymeleaf, Apache Tomcat.

### **Oracle Database**

Covering SQL, PL-SQL, and Modeling with Oracle technologies.

### **And much more...**

On my LinkedIn profile, in the certificates section, you can check the full list of courses and training I have completed. There are over 30 records with detailed descriptions and copies of certificates.

## • Academic Background

### **Post-Graduation in Information Security • (2022-2024)**

#### **Focus College**

Lato Sensu Post-Graduation in Information Security, covering the following subjects:

- Information Security, Cryptography, and Systems Audits
- Information Systems, Agile Methodologies
- Computer Networks, Security Risks, and Vulnerabilities
- Computer Architecture

### **Post-Graduation in Cloud Computing Architecture and Projects • (2021-2023)**

#### **Estácio de Sá College**

Post-Graduation in Architecture and Projects using Cloud Computing environments, covering the following subjects:

- Security in Cloud Computing
- Cloud Projects and Services
- SAD, Governance, Consulting, and Project Management PMI among others

### **Systems Analysis and Development • (2018-2020)**

#### **Unicesumar College – University Center of Maringá**

Course in Systems Analysis and Development, covering the following subjects:

- Computer Architecture and Operating Systems
- Algorithms and Programming Logic
- Software Engineering, Mathematics for Computing, and Data Structures
- Databases, Java Language, Project Management, and Entrepreneurship

### **Business Administration • (2016-2020)**

#### **Estácio de Sá College**

Bachelor's degree in Business Administration, covering various subjects on how to effectively manage a company. Some topics covered in the course were:

- Financial Administration and Financial Statement Analysis
- Project Management and Strategic Administration
- Quantitative Methods for Decision Making and Business Budgeting
- Managerial Accounting, Labor and Social Security Legislation, and much more
- Several other subjects on Administration, Finance, and Accounting

## • My Projects

On my LinkedIn profile, in the projects section, or on my portfolio website, you can check some projects I have developed during my freelance career. Visit and check for more information:
